Subject: Re: Request for final decision for manuscript number 2013_BMRJ_5622

The manuscript still needs further reversion:

1. Please separate the number and the unit for concentration, volume, time etc. such as 10 minutes, 1 ml, 0.5 µg/ml.
2. What is the meaning for pl? It is the first time I saw it and I asked the author to verify it last time.
3. Some errors are still there in the text, such as "Eschericia coli".
4. The reference list should be revised carefully according to the requirements of the journal. Too many variations exist in the manuscript, such as the title of journal, the number of pages, with or without the point (.) after the abbreviation, with or without a comma (,) after the journal title, use : or ; for separate the year and the volume number, space between the year and the volume number, etc.. For example:
J. Clin Microbiol. 2008, 46:2796-9.
J. Clin. Microbiol. 2000; 38:4320-4325.

Also, the reference 19 should be deleted and then the subsequent references should renumber.

Please check the last manuscript with my reversion.

Editor's Details:

Prof. En Tao Wang^{1,2}

¹Departamento de Microbiología, Escuela Nacional de Ciencias Biológicas, Instituto Politécnico Nacional, México

²State Key Laboratory of Agrobiotechnology and College of Biological Sciences, China Agricultural University, Beijing, China
