

SDI Review Form 1.6

Journal Name:	British Microbiology Research Journal
Manuscript Number:	2014_BMRJ_10772
Title of the Manuscript:	ANTIBIOTIC SUSCEPTIBILITY AND INTESTINAL EPITHELIAL CELL ADHESION PATTERN OF HOMOFERMENTING LACTIC ACID BACTERIA (LAB) ISOLATED FROM KUNU-ZAKI, A SPONTANEOUSLY FERMENTING NIGERIAN CEREAL BEVERAGE
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1.Title of paper should be reworded 2.Materials and methods: (a) references should be provided for the flow sheet for the production of 'kunu-zaki' (b) antibiotic susceptibility test: this a major flaw in the paper as it has shown that the author(s) failed to grasp the principles of antibiogram because of the types of antibiotics they used for the work. (c) Adhesion test: no authenticated (s) references cited and what is the meaning of 'MEM' used for the control and how were the cells prepared/harvested and why did the authors not include the concentration of control solution used for the work. (d). Lactic acid bacteria: it is interesting that the authors based the identification of lactic acid bacteria on temperature tolerance only and also referred to them as homofermentative! 3. Discusssion: this secio MUST be REWRITTEN as some statemwents were made on the false techniques used by the author(s)	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
