

SDI Review Form 1.6

Journal Name:	British Microbiology Research Journal
Manuscript Number:	2015_BMRJ_18012
Title of the Manuscript:	VIRULENCE OF FUSARIUM OXYSPOURUM ON KIDNEY ORGAN USING IN VIVO MICE MODEL
Type of the Article	Original Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- The aim of the study is not inline with the title. Consider to remove the 'kidney' in the title unless authors can put additional explanation of the virulence through kidney. - Lack of objective of the study inside the paper. - Please add the duration of samples collection in the methods. - The sentences in line 192 – 195 is confusing. The positive human samples 1265 and positive for F. oxysporum 544. What do you mean with positive human samples? Please re-write the sentence. - In page 4, better to use 'figure' than 'plate'. The figure of plate 5 and 6 describe the same message, please put it together. - in the discussions part, you should add more refferences from the other study from other researchers. Please improve the discussions especially how you determine the virulence. - In the conclusion, please conclude the results of the study to answer the objective of the study.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	To much figure, not too relevan with the paper. Please reduce the figure, especially the animals.
