PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Author(s) have not adhered to Journal format in preparation of manuscript. For instance the following should be noted: Abstract should be prepared in structural format according to journal guidelines using the subheadings: Aims, Place and Duration of Study, Methodology, Results, Conclusion. This is the prescribed format rather than as a single, long paragraph. The main headings: Introduction, Materials and Methods and so on should be numbered while subheadings should be numbered appropriately underneath them. Results and Discussion sections should be separated into different sections and not combined. Author(s) should at least provide references regarding the procedures used for carrying out studies. References Problems with references! References are supposed to be arranged serially in the reference list in the order in which they were cited in the text
