

SDI Review Form 1.6

Journal Name:	International Blood Research & Reviews
Manuscript Number:	Ms_IBRR_19616
Title of the Manuscript:	RELATIONSHIP BETWEEN GLUCOSE LEVEL, LIPID PROFILES, AND WAIST TO HEIGHT RATIO (WHtR)
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Please remove correlation between weight-to-height ratio and BMI. BMI is measured using weight and height so this is not an informative statistic.	
<u>Minor</u> REVISION comments	Consider comparing the correlation between WHtR -> lipid profiles and blood glucose to determine whether WHtR is more tightly correlated to these measures than BMI -> lipid profiles and blood glucose. Again, would not correlate WHtR and BMI because these measures depend on the exact same patient parameters with different mathematical manipulations. Page 3 line 75 "obtained" should be "obtain"	
<u>Optional/General</u> comments
