

Reviewer 4

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part and write here 'Corrected'/ if not agreed, give suitable justifications)
COMPULSORY REVISION comments	1. Grammatical errors are seen in many places. 2. Use wild yam instead of spontaneous yam. 3. Use past tense or past passive tense throughout this manuscript. Be consistent in the verb tenses. 4. Calculation for starch content was described twice in different places: P2/Line11 and P2/14. 5. P. 2/L11-12: Suggested "Acidity was determined with 0.1N NaOH solution ----". 6. P2/L10-11: Suggest "Total sugar contents were determined---". 7. P3/L6-7: remove "comma" after observation, and remove "with nutrients taken as variables" after F2. 8. Confusion and unclear meaning of the sentence in P3/L42-42: We also observed--- --slightly acidic" 9. In conclusion section, suggest " domestication introduces-----anti-nutritional factors." 10. Tables 1 and 2 were not mentioned in the text. 11. Page 5/Table 1, several superscripts should be corrected. Such as: water and energy for D. praehensilis. Superscripts for Total carbohydrates should not be italicized. 12. Classification of wild yam species by their chemical composition is interesting. Despite of the grammatical errors in many places, this manuscript is publishable with after proper revision is completed.	We took back the paper by following the various remarks and we hope to have it done correctly
