

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	MS: 2012/ IJBCRR/2431.
Title of the Manuscript:	Structural aspects of native and engineered metal clusters on bacterial surface layers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1) The title fits now much better than the previous one. I suggest a slight change of the title: Biophysical methods for the elucidation of the S-layer protein /metal interaction 2) SLP should be explained in the Abstract. 3) The legend to Fig. 2 should indicate, that the SLP is not drawn to scale (e.g. thickness of lipid bilayer approx.. 5 nm; those of SLP ≥ 5 nm) 4) Legend to Fig 4: please indicate whether the image shows a broken cell (cell wall fragment) or a self-assembly product formed by reassembly.	1) According to the reviewer's suggestion, the title was corrected. 2) SLP was replaced by surface layer proteins in the abstract. 3) The explanation was added in the legend. 4) The image shows a projection map of S-layers (self-assembly product formed by reassembly). It was added in the legend.
