PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The methodology portion is quite weak. The authors simply cited the procedures from other publications. They must at least summarize the procedure in the paper and cite any changes in procedure from cited sources. This is true for sections 2.1 to 2.9 and must be corrected properly.	Noted
<u>Minor</u> REVISION comments	Make the units uniform with proper significant figures. For example, in Table 1, the sweet potato units must be in grams such that significant figures are correctly made.	Thanks for your comments
<u>Optional/General</u> comments	Some discussions on why sorghum malt was used needs to be made. Are there any other alternative competing sources locally aside from sorghum malt? Is the cost justifiable?	I will do the corrections in the revised edition. Thanks.
