

SDI Review Form 1.6

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2013_IJBcRR_3859
Title of the Manuscript:	Comparative Evaluation of Anti-diabetic and Hepatoprotective Effects of Moringa oleifera and Bridelia ferruginea Leaves Aqueous Extracts on Alloxan Induced Diabetic Albino Rats

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The figures contain bars for the negative control. But the fact that the negative control group is not fed with the plant extract, it is not making sense to put bars related to them. This needs explanation. 2. The discussion part is not clear. Many places the authors have simply stated the graphical part in English sentences. Clear explanation for the results and reasons should be discussed. 3. Reference on WHO data is outdated. 4. More Literature on Moringa can be included. 5. Line 271 is a repeat sentence. Figure 1 has no labels on x and y axis. 6. The abstract should be shortened, no abbreviations should be used in abstracts.	The negative control represents diabetic rats without treatment which controls diabetic rats with treatment as explained in experimental design. Positive control is the normal group with normal rats. The discussion part has been improve. Has been replaced with recent one. More littérature on Monringa has been added. Has been included
<u>Minor</u> REVISION comments	The authors need to carefully check the manuscript for other minor errors.	All the correction in the revised manuscript are in red colour.
