Subject: RE: Request for final decision for manuscript number 2013_IJBcRR_5105

I am herewith attaching the editor's final decision of the IJBcRR_5105.

Attached Part:

Title: Role of Human Beta Defensin -2 and Oxidative Stress Parameters in Ovarian Cancer Patients

Authors: A.F. Abdel-Aziz1 et al.

Decision: The revised version has been appropriately revised according to each review comment as examined. Therefore, the revised MS can be accepted for publication.

The relationship between human beta defensin-2 and oxidative stress in ovarian cancer patients has been addressed through the limited patients clinic resources. 29 patients with ovarian cancer and the 15 control group were subjected to the examination in the gynecology clinic. Lower human beta defensin-2 and oxidative stress levels are linked for the cancer pathogenesis.

Before publication, several editorial arrangements can be made: For example, $P=.001$ should be $P=0.001$ through many place.
