

SDI Review Form 1.6

PART 1:

Journal Name:	<u>International Journal of Biochemistry Research & Review</u>
Manuscript Number:	2013_IJBcRR_5593
Title of the Manuscript:	Peptides Corresponding to Intracellular Regions of GPCR as a New Generation of Selective Drugs
Type of the Article	Review

General guideline for Peer Review process is available in this link:

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	None	
<u>Minor</u> REVISION comments	The authors should elaborate on CXCR4 modulation in neoplasia. More to the point, one can envision treatments based on targeting CXCR4 in multiple myeloma, still an incurable cancer whose biology widely relies on the SDF1/CXCR4 axis.	
<u>Optional/General</u> comments	The manuscript moves across the most important functions of GPCR and their modulation by an array of drugs that selectively target specific downstream signaling. It is a fascinating field in both biologic and therapeutic terms. At first, I pondered over the manuscript to judge its merits and faults; in the end, I concluded that the manuscript is timely, comprehensive, concise, enjoyable. An outstanding piece of work. I should like it published.
