

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_10131
Title of the Manuscript:	Cardiometabolic risk factors among South Indian obese adolescents and its correlation with insulin resistance among them
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	RE: reviewing a paper entitled "Cardiometabolic risk factors among Indian obese adolescents, etc." I have the following comments: 1- The paper is jumbled up; 2- The title is not in line with the paper; 3- Is it cardiometabolic, cardio-metabolic, or cardio metabolic? 4- Is HOMR an anthropometric measurement or biochemical? 5- Metabolic syndrome has six parameters: waist circumference, glucose, triglycerides, systolic BP, Diastolic BP, and L-HDL;. 6- You don't start an abstract with introduction but background; 7- Is about obese(as the title), obese and non obese, or obese-overweight; 8- The results are in the discussion; 9- The abstract, if it is, does not reflect the study, and	It is cardio metabolic . HOMA-IR is biochemical measurement calculated on the basis of insulin level and blood glucose level. It is comparison between obese and non-obese. We made corrections in discussion. We mainly concentrating on cardio metabolic risk factors.
