SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Title: The title of the article should not contain "and/or". Make it "and" The conclusion part could be stated more effectively	It has been amended It has been corrected
<u>Minor</u> REVISION comments	Page 1: line 16: Language check Page 1: line 20-21: Rewrite to form meaningful sentence; break the long sentence Page 3: Line 55: the sentence is abrupt. Page 4: line 87: Language / sentence check Page 8: line 175: sentence check Page 8: line 183: sentence check	It has been changed It has been modified It has been deleted It has been modified It has been modified It has been corrected
<u>Optional/General</u> comments	The authors have conducted a very useful study. The work is publishable and the information contained in the article is valid. However there is a serious issue: Most part of the results stated in this article has been already published elsewhere: El-Bahr SM, Taha NM, Korshom MA, Mandour AEA, Lebda MA. Influence of Combined Administration of Turmeric and Black seed on Selected Biochemical Parameters of Diabetic Rats. www.scopemed.org/?mno=154650 [Access: May 21, 2014]. doi:10.5455/ajvs.154650 The editor may accordingly take note of this fact and decide.	Yes, I have published part of this work. However this manuscript contains the whole work, containing the effect of black cumin seed alone, the effect of turmeric alone and the effect of combined administration. This article is conclusive and contains the complete work as well.
