

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_11718
Title of the Manuscript:	Age-Dependent Effect of Cyclic Feeding Regimen on The Level of Serum Apolipoproteins in Young and Old Rats
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. the introduction, the processes of serum collection and SDS-PAGE should be simplified; 2. the grouping is not clear, and rat numbers in each group were not mentioned; 3. the materials were not mentioned; 4. the method and process of determination for apoprotein were not mentioned, and why not use rat apoprotein ELISA kit, but SDS-PAGE? 5. the conclusions that the contents of apoE, apoB100 and apoA1 in young and old rats were different after different dietary regimen, were not newly verified, but its clinical significance and suggestions for living styles.	1. All sections were simplified. For details, see the text. 2. Additional figure (Fig. 1) reflecting the grouping was included in the manuscript. The number of animals in each group is mentioned in the section 2.2, line 82. 3. The materials paragraph has been created (see Section 2.1). 4. The procedure of apolipoprotein determination is described in Section 2.3. 5. We quite agree with this remark. In the future we would perform more detailed analysis of the effects caused but such dietary regimen.
<u>Minor</u> REVISION comments	The grammatical mistakes should be corrected, e.g. line 19, past tense form should be used in this sentence; line 86, the verb of continued wouldn't be passive voice; line 96, rats of every group should be rats in each group; line 136, pairwise should be passive voice in this sentence, etc.	All mentioned mistakes have been corrected.
<u>Optional/General</u> comments
