

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_12979
Title of the Manuscript:	In silico inhibitory activity against caspase 3 by zinc(II) coordinated complexes
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	No doubt this article has very important contributions towards scientific development in chemistry. However, I am of the view that since the complexes prepared and used in this studies are not new, the x-ray crystal structure, which I found in line 83 to have been previously published need not to appear in the article again. This is mere repetition.	The part of the procedure reported in the published article has been removed and modified which can be found in Line 79-81. And the second compound is not reported.
<u>Minor</u> REVISION comments	Minor revision is required to take care of the comment above.	
<u>Optional/General</u> comments	Publishable
