

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_13499
Title of the Manuscript:	Properties of amyloglucosidase in the digestive tract of <i>Periplaneta americana</i> L. (Blattodea: Blattidae)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Authors reported effect of temperature along with thermal stability. They should include pH stability along with effect of pH.	The authors only investigated effect of pH on amyloglucosidase. pH stability will be investigated in subsequent studies. Thank you.
Minor REVISION comments	• Last line of "study design" i.e 'view to predicting possible-----applications' should be modified with "view to predict possible-----applications". • In the section 2.3: the authors used Bernfeld method for the estimation of reducing sugar. In this method whether they have not used dinitro salicylic acid? If they used then mention it in the text. • Add Fold purification in the Table 1. • Add references after the last statements in the section 3.3 (line220) and section 3.5 (line no. 262). • Add vol. In reference 5.	In the phrase with a view to, to is a preposition requiring a noun. In this case, a gerund (the -ing verb form) is used as a noun. Dinitrosalicylic acid has been mentioned in the text The purification factor has been included in Table 1 The references have been added The volume has been added.
Optional/General comments	The manuscript is well written.	Thank you.
