SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	<i>N. sativa</i> is used as a promising feed additive due its known nutritive and protective effects. In manuscript, the effect of the N. sativa oil on the following important blood parameters in sheep was evaluated. The trials seemed to be done well, and the results are scientifically interesting, but explanation for background and discussion would be insufficient.	Thank for revision comment for our article. Really no comment about the comment of this reviewer Again I give him / her all thanks
Minor REVISION comments	Figure 1-3 need revision. References 19 need revision. All references were too old. Suggest updating them.	We are rewriting a new reference instead of old one. In addition all figures show in clear performance.
<u>Optional/General</u> comments
