SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The aim of the manuscript entitled "Serum zinc and copper levels in children with Plasmodium falciparum infection in Nigeria" is to determine the serum zinc and copper levels in children with or without malaria. The manuscript is well written and the experiments are carried out carefully. However the work lacks significance to the field since the conclusion is that there is no difference. Therefore the authors should consider submitting their work to a more specialised journal.	A negative result is a valued result.
