

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_10394
Title of the Manuscript:	Anti-venom Activity of Mucuna pruriens Leaves Extract Against Cobra Snake (Naja hannah) Venom

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The author mentioned that “the venom dose was decided after several works in our laboratory” in order to clarify it please notifies it in the text that “the venom dose was estimated according to our preliminary experiments”.</p> <p>I only wanted to mention even the faculty not give ethical number author should apply ethical committee to get permission and number to prove it. Generally journals don't accept without number of ethical approval number for animal study.</p>	<p>Suggestion has been included in the paper. New corrections made in blue.</p> <p>Noted. The study was done in accordance with the guidelines for animal use of Faculty of Sciences, Bingham University and had the project ID: BCH/02/012.</p>
