

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2013_IJBcRR_7866
Title of the Manuscript:	Synthesis and Spectral Study, Theoretical Evaluation of New Binuclear Cr(III), Co(II) and Fe(III) Metal Complexes Derived From pyrane-2-one and its Biological Activity

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Title should be corrected. 2. English and grammar of the manuscript is not completely corrected. 3. The manuscript still has lot of typing mistakes, which must be corrected. 4. Formating of the manuscript is still required. 5. Formating of the References is still required. 6. Authors did not include different biological activities data as suggested and no attempt was made to establish structure-activity relationship.	Synthesis and Theoretical Evaluation of New Binuclear Cr(III), Co(II) and Fe(III) Metal Complexes Of Tetradentate Schiff base And its Biological Activity Completely corrected Completely corrected Formatting of the manuscript corrected Formatting of the References corrected Authors discussion the biological activity
