

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_9962
Title of the Manuscript:	Biochemical changes induced by natural infection of trypanosomosis in Burkinabese local breeds of small ruminants Title changed by: Investigation of biochemical parameters in Burkinabese local small ruminants breed naturally infected with trypanosomosis

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have to add a statement of ethical issue as well as consent information from the owners. Abstract Please change "aimed to establish standard" to be "aimed at establishing standard" Materials and Methods Line 62: Please add a section about the study population, clinical examinations, selection criteria (inclusion and exclusion criteria). Result section Please add the details clinical picture of the infected animals.	An ethical issue is added "at" is added Sampling section is divided into: Study population and Collection of blood samples. In the section Study population selection criteria were added. Although, clinical examination was not done during samples collection. This study is part of a cross sectional survey of animal trypanosomosis within the framework of Pan African Tsetse and Trypanosomiasis Eradication Campaign (PATTEC) in Burkina Faso. Selected animal did not undergo for follow up. The cases of trypanosomosis were diagnosed by microscopy and diseased animals were treated.
