Subject: RE: Request for editorial decision for manuscript number 2014_IJBcRR_12237

I have carefully gone throughout the overall reviewing process. Indeed, this has been complex due to the lack of answer of two reviewers during the process. However, the result of the reviewing process has been positive and the manuscript has clearly improved and deserves to be published. I recommend minor changes as follows:

In abstract L24: *concluded* instead of *conclude*

L43. The first sentence needs to be rewritten, being more precise. In particular, *the enzyme* is a very ambiguous expression and need to connect with the previous sentences.

L48. Please, rewrite the sentence for better understanding.

L164 *increased* instead of *increases*

L223. The reference should be numbered (14)

L310 *patients* instead of *patient*.

L330. I would also add that gender studies are necessary.

In addition, I would recommend also checking the grammar style throughout the whole document.
