

Clarification Table

Section of manuscript	Your manuscript	Previously Published manuscript	Authors clarification
Title	renal function and oxidative stress	renal oxidative stress and biomarkers	in our MS we use orlistate and herbal mixture and high fat diet for model
abstract			our Ms is different in the aim, methods, result and conclusion
Introduction			we show the effect of HFD and renal function and orlistat effect
Methods			Pumpkin oil, Nutshell and or;istate have been used as treatment that different from other study. The time use in our study is 22 weeks, and HFD, tissue sampling and microscopic exam is

			different from other study. Also the measured parameters was different.
Results and Discussion			The results, data and mechanism of actions were different from others
Conclusion			The conclusion is different in point of , treatment with Orlistat and herbal mixture ameliorated the harmful effects of the HFD and reduce feed intake, MDA level and decreased oxidative stress in renal tissues.
Reference			is completely different

We indicate that the paper is not the same and the previous paper also is our work dealing with Garcinia effect

There are differences in the aim, methods, results and conclusion
