

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2015_IJBcRR_17119
Title of the Manuscript:	The Nephroprotective Effects of Graded Concentrations of Calcium and Magnesium on Nephrotoxicities Induced by a Constant Toxic Concentration of Cadmium and Lead in Rats.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	1. The model control group (Pb 0.327mg/L +Cd 0.079 mg/L , and Mg 0mg/L,+Ca 0mg/L) should be designed. The model control group can be compared with the normal group (tap water), in order to determine the success of the damage, at the same time, it can be compared with treatments with intervention (Pb+Mg+Cd+Ca). 2. The design reasons of concentrations of magnesium, calcium, lead, and cadmium should be explained.	1. This point is noted for subsequent work. 2. This point is noted and included in the corrections in yellow.
<u>Minor</u> REVISION comments	3. The randomized method of grouping needs to indicate.	4. This point is also noted and included.
<u>Optional/General</u> comments
