

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_15784
Title of the Manuscript:	Kinetics For The Inhibition of Serum Acetylthiocholin Esterase Activity by Some New Phenobarbital Derivatives.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Please re-draw the michaelis-menten graph. (figure 1 and 3). Standardised the figure option. For kinetic study, the michealis menten plot should be has a similar pattern such as Ferreira et al 2010 and Sabullah et al 2014. To make it smooth and clear, you need to automatically generate the data using free version software such as GraphPad prism version 4 or 5, or other possible software. -The Michaelis-Menten graph is still wrong. Please re-draw using possible software. -The author did not revised based on the track changers' file. -Please re-do the revision based on attached file [2014_IJBcRR_15784 (corrections 11.1.14)]	Thanks for long breath with me. I re-draw figures 1 and 3 as I can. I wish to use graphpad prism but with bad luck, the order in the program open only in computer windows XP 34 and I could not found these old computer in my collage. I send the final corrections on paper as pdf to prevent any changing in formatting. I did all the correction based on attached file. Finally really I have more benefits from yours and other reviewers comments to rise my performance thanks a lot.
