

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_15864
Title of the Manuscript:	Comprehensive Roles ofTP53 in Cell Signaling, Apoptosis, and Carcinogenesis – A Review
Type of Article:	Review Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The superficial modifications done on the manuscript by the authors are insufficient. The text is poorly written and does not show the advances on P53 research in the last 10 years. In the author's comment they indicated "As far as recent literature is concerned so this manuscript is drafted to keep in view the basics of p53 and its associated processes, which can help a researcher to have a general overview of this gene and its expression". This objective is overtaken in a very good review "Unravelling mechanisms of p53-mediated tumour suppression. Bieging KT, Mello SS, Attardi LD.Nat Rev Cancer. 2014 May;14(5):359-70."	All the possible changes had been made in the previous manuscript. There is no room for further alterations in the article.
