

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2014_IJBcRR_10575
Title of the Manuscript:	(1H-pyrrolo [2,3-b] pyridine)7-Azaindole Derivatives and their antiurease, Phosphodiesterase and beta-glucuronidase Activity

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. The revised manuscript is now much better and can be accepted for publication in this great journal. 2. Secondly there are some few issue that if corrected the article flow will be much better i.e the result decimal places i have noticed that the authors write the data Randomly i mean example: compound 2 ($IC_{50} = 20.83 \pm 0.234 \mu M$) compared to standard EDTA ($IC_{50} = 274 \pm 0.007 \mu M$). also compounds 10 ($IC_{50} = 255.1 \pm 6.62 \mu M$). If the authors can make all the data with same decimal point either 1 decimal point or whatever choice It will be fantastic. 3. Lastly, the spacing also between either comma and reference citation or the other should be addressed. Beside I congratulate the authors for the contribution I think there is some writing at the end after the Reference is this part of the paper he2????	1- Thanks for acceptance of the revised manuscript for publication in this great journal. 4. 2-All the data with same decimal point (with 2 decimal point) has been written. It has been fantastic. 3-As desired, the punctuatons have been corrected. The writing at the end after the references is not the part of the paper, That portion has been deleted. Erroneously I forgot to delete those wordings.
