

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	2015_IJBcRR_17862
Title of the Manuscript:	A comparative study of the effect of heating on antioxidant potential and lipid profile of two vegetable oils- sunflower oil and sesame oil- commonly used in culinary.
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Although authors have accepted and corrected most all indicated corrections. There are some problems in general construction of this paper that lacks adequacy for publication, for instance, consistency of language, tables and figures in adequate format, among other items. But, that part must be better revised by editor who should give final decision about acceptance of this manuscript. Since it is not part of reviewer's work to do english language corrections, it is strongly recommend submit the text to english revision service. Another recommendation is that the title should be altered to: A comparative study of the effect of heating on antioxidant potential and blood lipid profile of mice consuming two vegetable oils- sunflower oil and sesame oil- commonly used in culinary. Because the current title is causing certain confusion to readers since it sound like the antioxidant potential and lipid profile were done in oils and not in the blood of mice.
