SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript has particularly relevance and was very well written. There are enormous necessity to discover more information about the relationship between hepatocellular carcinoma and hepatitis C virus. Many people die every year because this virus. The authors did a good job and I do not have more compulsory comments.	
<u>Minor</u> REVISION comments	I have only small corrections in this manuscript. First, I think that it is necessary a space before the word "Italy" in line 110 and after "at" in line 114. It is necessary an end stop after "al" in lines 119 and in the end of 204 line. In this same kind of error, I have not found a comma after the word "primer" in line 142, after "populations" in line 208 and after the "controls" in line 350. In lines 155 and 197 it is not needed a colon after the titles. It is required change the "There" in line 158 for "there". The word "is" in line 183 is wrong. In table 2 do not have reference SNP that was descript in legend. The "Table 4" is doubled in line 349. For end, I suggest that the references should be standardized according the Author's Instruction.	
<u>Optional/General</u> comments
