SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The main goal the current research paper is connected with study on the concrete reasons, underlining the aneurisms (both true and false) in each concrete patient, which is very important for determination of the optimal schemes for therapy and/or prevention in each concrete case.	We agree. See changes in the text.
Minor REVISION comments	By taking in consideration different parameters and biochemical indices in different individuals with any multi-factor disorder, what kind are the aneurisms (both true and false), maximally effective and safe therapeutic strategy for each concrete case in the presence of common clinical symptoms, is possible.	This has been included in the manuscript.
Optional/General comments	Sincerely recommend the current Case Report be published in the current issue of "International Journal of Medical and Pharmaceutical Case Reports", after minor corrections	Thank you.
