SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This is a very interesting work with a great time of analysis. (4 years). The introduction is extremely shortened. There are anonymous references. Revise it. The results presented are concise. However, the discussion is very brief and contains few comparisons with other works. The references are few and too old. Review it, please. Cite authors and latest results. Discuss and compare the results of this work with other Authors.	The anonymous references are mostly reports and proceedings and or conference papers we have at the institute's library that I consulted. Discussion has been expanded however the references are difficulty to come by since work on this area is scanty. I have searched and added few recent references.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
