PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Authors answered that "The wrong citations have been corrected in the revised manuscript. References are numbered in the order that they appeared in the revised manuscript as instructed by the reviewer" – however in the last version of manuscript they are still in wrong style (Lines: 42, 47, 51 etc). In the whole manuscript citations are not agreed with IJPSS demand.</p> <p>I would like remember once again that: References must be numbered in the order that they appear in the text and <u>in the text, citations should be indicated by the reference number in brackets.</u></p> <p>Besides above, I accept the last version of manuscript. Authors answered carefully on the whole my suggestions – thank you for this and I would like to mention that after Authors supplementation manuscript is proper for publication by IJPSS. (Of course after references corrections).</p>	<p>The references are numbered adequately in the text, and the citations are indicated by the references number in bracket as the suggested by the final reviewer, and also agreed with the IJPSS demand.</p>
