**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	The safernac is an interesting model which can help a lot of farmers to achieve better results in crop production and environmental security. However, I believe that exist another parameters that needs to be evaluated for enhance precision model levels, ie, calcium, magnesium, micronutrients levels. Some physical parameters would present good correlation with coffee yield and soil organic matter as well, like soil aggregate stability which would be helpful.	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
