

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	2013_IJPSS_6883
Title of the Manuscript:	An integrated soil fertility management decision support tool for coffee: model structure and calibration for Northern Tanzania

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The title was improved, abstract and keywords were modified. Although the acronym used in the title (ISFM) should not appear at the end of the summary, this in order to understand it. The introduction and methodology were modified and the arm. The discussion holds some methodological elements that should be moved to that chapter, for example lines 189-191, point 3.2, etc. The conclusions were improved and references. Minor changes are required in the paper, please check suggestions in the text.
