

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

Journal Name:	<a href="#">International Journal of Plant &amp; Soil Science</a>
Manuscript Number:	2014_IJPSS_15921
Title of the Manuscript:	Effect of soil micronutrients (Zinc and Boron) on yield and uptake of wheat in an acid soil of West Bengal, India
Type of the Article	Original research article

### PART 2:

FINAL EVALUATOR'S comments on revised paper	Authors' response to final evaluator's comments
<p>The authors reflected satisfactorily the entire reviewer's comments. However, some revisions are still required: 1) the decimal digits in the tables are questionable. The some number if digits is better for formatting but not for the data itself. If you have for example thousands, the data cannot be measured with precision to two or more decimal digits.</p> <p>2) line 111: Sulphate still remains with capital letter here. Similarly, check lines 165-166. In the opposite, Grain weight in the headings of Table 3 should be with capitals.</p>	<p><b>1) Yes, we have changed the decimals in tables. We kept single decimal where the value is little higher and two decimals with values lower than 0. We did not produce any decimal for grain and straw production values as they are too high compared to others.</b></p> <p><b>2) Corrected.</b></p> <p><b>3) Corrected.</b></p>
