

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	2015_IJPSS_16063
Title of the Manuscript:	The lowermost Chara locality in the world near Dead Sea, Israel
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The corrections were satisfactory and I have only few suggestions that could be or not considered by the author:</p> <p>Suggestions:</p> <p>1. You might standardize your comments and description using Summer and Winter instead of January and June (the months could be cited only in the material and methods) to the material and methods , results and discussion will be better keep Summer and Winter (by this way you could change it for example in the graphics).</p> <p>2. You might consider to include “periphytic” in the title or among the key-words.</p>	<p>1. corrected</p> <p>2. we take planktonic samples also as mentioned in the MM, therefore we cannot include “periphytic” in the title nevertheless in revealed community we found mostly attached algae.</p>
