

Editor's Comment:

Following evaluation of all documents related to the manuscript that the text is amended in accordance with many suggestions and requirements of the Reviewers and is improved comparing to the original submission. However, additional revision is needed.

1. Full names of all Authors should be provided. Currently only initials are written before the names of two Authors.
2. The manuscript contains many abbreviations. In such circumstances the additional section ABBREVIATIONS must be added, and all (I repeat: all) abbreviations, acronyms and denotations used in the text must be explained in this section.
3. In 'Materials and methods' some information about statistic must be added. The most important is information about statistical test used, software, replications etc.
4. According to the Journal requirements two paragraphs must be added, i.e. COMPETING INTERESTS and AUTHORS' CONTRIBUTIONS.
