SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The paper "Mitigate climate change impact: Maximizing the tolerance of eggplant to salinity stress using selenium supplements" studies a very interesting subject, yet according to my perspective at the present stage cannot be accepted. The following items were considered:</p> <p>1-The abstract is too long and it has too many details. 2-The introduction is Ok, being the major issues of the problem characterized. 3-Materials and Methods are insufficiently described. More details should be provided, particularly at the analytical procedures. 4-Results and discussion is mostly descriptive and less self-explanatory. 5-A large amount of references are rather old, which limits the value of the introduction and discussion. 6-The conclusion is too much general</p> <p>Nevertheless, considering the relevance of the study, the paper should be considered for a new evaluation if the authors comply with the referred points.</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
