

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	MS: 2012/IJTDH/2660
Title of the Manuscript:	PRESENCE OF AEDES ALBOPICTUS in Palestine –West Bank.

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
-The paper has greatly improved. -Please correct the name of the species: <i>Ae. albopictus</i> in several citations -In mat and Met “The result shows that 590 different immature stages (550 larvae and 40 pupae) of mosquitos were collected. Only larvae were identified. The results show that (300;0.6%) of larvae were <i>Ae. Albopictus</i>”. Why 300 specimens are 0.6%, you mean 60%? -Same comments for this statistics: “The results show that (31;0.26) of positive site have adults or larvae of <i>Ae. Albopictus</i>, The results show (17; 0.48%) and “the results show that the breeding sites for immature stages were only one (0.004%)” and please correct the percents in Table 1, 2 and 3.
