Subject: Re: Request for final decision for manuscript number 2012 IJTDH 2973

I am attaching the comments on IJTDH#2973.

Attached Part:

Manuscript: IJTDH 2 9 7 3

Title: Behavior Change Communications during Antenatal Visits Using Pictorial Cards Improves Institutional Delivery Rates: Evidence from Matlab, Bangladesh

Comments:

To Authors:

1] In general, the manuscript is required English editing since many sentences are awkward in the text.

2] Table 2 needs to be aligned neatly.

3] $P=0.00001$ in the note of Table 2 is meaningless. The authors should use proper standard "p" value for statistics.

4] Lines 195-196:

The following sentence "...In multivariate analysis when confounding effects of all covariates in the model were controlled statistically using binary logistic regression model in SPSS 16...." is not correct in econometrics point view. Read p39- in AJPH, January 2013, vol.3, no.1.

5] What is the theoretical model for this analysis?

6] In general, all tables are neatly aligned.

Editor's Details:

Tetsuji Yamada

Chair and Professor of Health Economics, Center for Children and Childhood Studies
Rutgers University, the State University of New Jersey, USA
