

Manuscript: IJTDH #2973

Title: Behavior Change Communications during Antenatal Visits Using Pictorial Cards Improves Institutional Delivery Rates: Evidence from Matlab, Bangladesh

Comments:**To Authors:**

1] Table 1;

Each horizontal space between items and variables is too specious. Please reduce the space size. The current one is unprofessional academic writing skill. The readers of IJTDH have very difficult to read and grasp the table's outcomes.

In addition, please align the decimal point for "age less than 35".

2] Table 2;

Each horizontal space between items and variables is too specious. Please reduce the space size. The current one is unprofessional academic writing skill. The readers of IJTDH have very difficult to read and grasp the table's outcomes.

3] Table 2;

Please raise the 1 or 2 font larger for the note under the table. The current one is too small.

4] Table 3;

Each horizontal space between items and variables is too specious. Please reduce the space size. The current one is unprofessional academic writing skill. The readers of IJTDH have very difficult to read and grasp the table's outcomes.

5] Table 3 Logistic regression;

What are the variables, the coefficients, p values, sd, and ci.

Please clearly indicate these. Please note that many readers of the IJTDH are not understand the outcomes based on the current format.

6] Table 4;

What is the results of statistic regression. Please indicate it with the title.

What are the variables, the coefficients, p values, sd, and ci.

Please clearly indicate these. Please note that many readers of the IJTDH are not understand the outcomes based on the current format.

7] Table 4;

Each horizontal space between items and variables is too specious. Please reduce the space size. The current one is unprofessional academic writing skill. The readers of IJTDH have very difficult to read and grasp the table's outcomes.

8] What is the theoretical model for this analysis?

Please clearly make a structural model and its explanation in the text.

9] In abstract;

Please include "study design" and "place and duration of study" in "Method", not "methodology".
