

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	<u>International Journal of TROPICAL DISEASE & Health</u>
Manuscript Number:	2013_IJTDH_6187
Title of the Manuscript:	Effect of Alcohol consumption on some haematological and haemostatic parameters among consumers in Birnin Kebbi, Kebbi State, Nigeria

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have modified the article. The clinical and biochemical data are not presented as suggestion. The occurrence of low platelet count and poor coagulation in chronic liver disease is not new and appears in all textbooks. The authors may discuss the importance of "low platelet count and poor coagulation" as simple and cheapest methods, which are regionally important, to help the early identification of serious liver disease in Nigeria.	We have included a statement in the discussion that low platelet count and poor coagulation can potentially be used as simple and cheapest methods that can be used regionally to help the early identification of serious alcohol-related liver disease in Nigeria
