

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2013_IJTDH_6670
Title of the Manuscript:	Can We Predict Postgraduate Dental Training Choice?; The Nigerian Experience

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Authors should endeavour to edit the paper through the aid of a native English Language editor. I started but I definitely cannot complete it. You can observe this from the revised Ms. Authors should look for professional help and provide evidence that they have done so! There's a shortcoming in the statistics from which major inferences of this study is drawn.	We have extensively polished the manuscript . We have also used an online editing site. Evidence: https://prowritingaid.com/en/Analysis/Editor# We have addressed issues with statistics. All the factors assessed in component analysis accounted for 47.9% of potential predictors. The authors reduced the large number of factors assessed into manageable groups through factor analysis which resulted into three main groups – Income-related, Skills-related and Work-Hours-related predictors.
