

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2013_IJTDH_6670
Title of the Manuscript:	Can We Predict Postgraduate Dental Training Choice?; The Nigerian Experience

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In the methods the authors mentioned that they did a literature search before building the questionnaire, and my comment was "to give a reference (s) for the literature searched". Plz provide the needed references. I have mentioned that the p value must not be written as $p = 0.000$. Each 0.000 must be written as $p < 0.001$ as no p value equals exactly to zero because we are working on samples and not the whole population.	Done. These statements have been added to the text: The major work which greatly influenced the factors included in this study was that of Arowojolu and co-workers.[4] and As previously mentioned, the major work which influenced the content of the questionnaire used in this study was by Arowojolu and co-workers, [4] other works were also considered [6],[7] amongst others. Corrected.
