PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Authors should follow SDI "in text" referencing style. Please refer to SDI instruction for authors for guidance. Please visit: http://www.sciencedomain.org/page.php?id=general-guideline-for-authors 2. Authors should please check the following sentences extracted from the revised paper and make appropriate corrections: Aims: Alcoholism is a global public health problem <u>a</u> with significant socioeconomic implications. Conclusion: Evidenced data generated can facilitate the development of a policy on the effective manage There is need to enact laws that regulate the production, sales and consumption of various alcoholic beverages to prevent abuse and protect the health of citizens.	1. We have corrected the referencing in the test following the SDI instruction for authors. 2. Alcoholism is a global public health problem with significant socioeconomic implications. 3. This report has shown that alcoholism has multiple negative effects on platelets and coagulation factors. Evidenced data generated in this study can facilitate the development of a policy on the effective management of alcohol –related effect on platelets and coagulation factors. There is need to enact laws that regulate the production, sales and consumption of various alcoholic beverages to prevent abuse and protect the health of citizens.
