

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

|                          |                                                                                                    |
|--------------------------|----------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">International Journal of TROPICAL DISEASE &amp; Health</a>                             |
| Manuscript Number:       | 2013_IJTDH_4985                                                                                    |
| Title of the Manuscript: | <b>PATTERN OF NEONATAL MORTALITY IN A TERTIARY HEALTH FACILITY IN UMUAHIA, SOUTH EAST, NIGERIA</b> |

**PART 2:**

| <b>FINAL EVALUATOR'S comments on revised paper (if any)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <b>Authors' response to final evaluator's comments</b>                                                                                             |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>This article is now almost camera-ready. I have made very minor corrections of editorial nature, which are tracked and in red on the body of the text.</p> <p>In Table II, some of the rows are poorly aligned causing a parallax effect. More importantly, the figures do not add up. The most obvious error is under <b>“Miscellaneous”</b>, which was entered as 16 instead of 10. (See Table II in the original paper). I have attached the table with the corrections to replace the one in the article. The editorial team should adapt the table to the house style of the journal.</p> <p>The section under “Results” referring to Table III has been deleted since this table was in fact deleted in an earlier review.</p> | <p><b>All the corrections tracked in red have been adopted. Moreover table II has been rewritten based on the changes made by the reviewer</b></p> |
