- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	No major comment	
<u>Minor</u> REVISION comments	I think that they can denote that one of the reason of inadequate man power is brain drain.	
<u>Optional/General</u> comments	I think that although we have to follow general roles of scientific transplantation, but we can use domestic methods too. For example they were concern about autologous transplantation because of lack of cryopreserving of cells, but it is possible that by changing conditioning regimen shorten period between apheresis and transplantation and use cells preserved in room/refrigerator temprature for 3-4 days.
