- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	1. The authors reported a 32-year-old female patient with low abdominal pain after an operation 12 years ago. Retained surgical sponge with gossipiboma formation was proved on a second operation. The literature review is adequate. However, this uncommon surgical complication has been well described and the authors did not provide any new information on its diagnosis and treatment. The preoperative work-up and differential diagnosis seem not enough to support the decision-making. 2. There are grammatical errors and typos throughout the text. For example, line 36 and 56: 32 year, 32 years old--32-year-old line 45: gossipibona--gossipiboma
