

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2013_IJTDH_5021
Title of the Manuscript:	Community Based Monitoring under NRHM at Village Level in the State of Maharashtra, India

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The paper indicates seven references but only two are mentioned in the text. There is a mention only of the Census. One wonders what portion of the paper was derived from which literature and what then belongs to authors themselves. It is also not clear if the sources were not just mentioned when nothing was derived from them. Many scientific researchers will be very reluctant to use this paper as sources due to this gap. However, the paper can be published as it contributes to the creation of new insight on the field. Topic: Is relevant, Abstract well written and the paper well packaged except for the gaps indicated above.
