Despite the fact that the authors wrote that "Health-care-associated infection in Africa: a systematic review", <i>Bulletin of the World Health Organization</i> 2011;89:757-765" was considered in their revision, there is no mention of this important article. Some ancient references should be erased. No specific comment on the very high rate of infections in HIV+ pts: why? This point is worthy to be shortly described (which site? Which organism?)
